

25 PLI Creping Holder

Applications

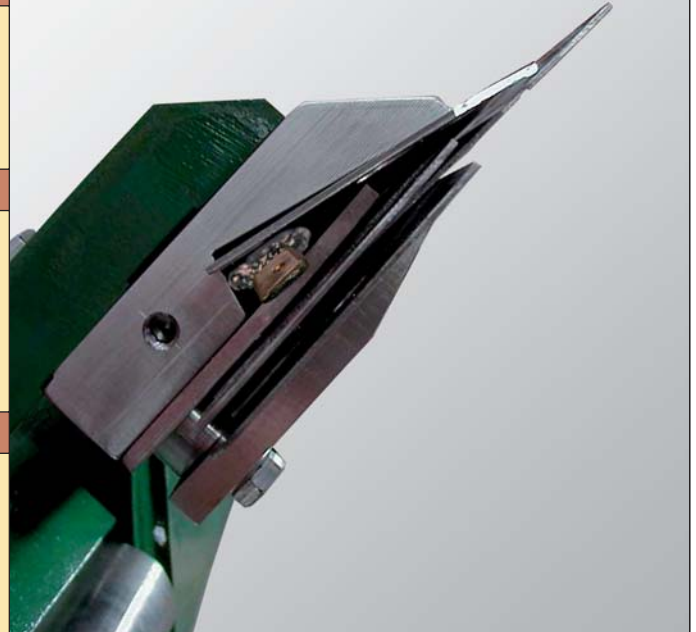

The Conformatic L blade holder has been specifically designed for Yankee doctoring systems with PLI requirements up to 25 PLI. The Conformatic L provides uniform sheet quality, reduced Yankee wear, and longer blade life.

Features

- ▶ Lower profile than traditional Yankee holders
- ▶ Profile adjustment screws
- ▶ Composite backing blade
- ▶ Polymeric or liquid filled profile tube
- ▶ Unique patented edge relief finger system

Benefits

- ▶ Open design for easy cleaning
- ▶ Conformability for edge relief and uniform cleaning
- ▶ Rapid blade changes
- ▶ Even blade wear

Conformatic L blade holder mounted to doctor.

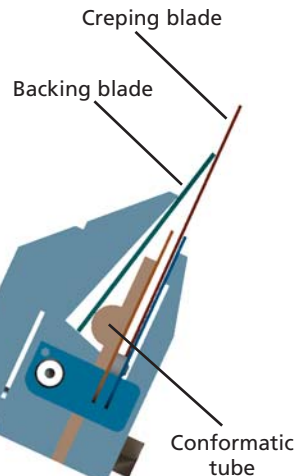

Reliable creping and cleaning

When a full featured creping holder and extra high loading requirements are not an issue, a traditional creping holder may not be the best fit for your application.

The Conformatic L is specifically designed for applications where the PLI will not be above 25 PLI, yet there is still a need for the reliability and features of a top of the line holder. Typical examples include most cleaning and cutoff positions, as well as some creping positions.

The Conformatic L has a lower profile than the Conformatic XL® blade holder, our top of the line creping holder. It inherits integral features from its sibling, like edge relief and uncompromising rigidity at a competitive price.
