

# SXB Steam Joint with Advanced Syphon System

## Improve Reliability

### Applications

High-pressures and high-speeds require a joint and syphon system designed specifically for corrugating applications. The SXB self-supporting joint and journal-mounted locking elbow system offers improved reliability and runnability for all single facer positions including upper and lower corrugating rolls, pressure rolls, preheat rolls, and preconditioner rolls.

### Features

- ▶ On-machine measurement of seal wear
- ▶ Two internal carbon bushings with maximum separation
- ▶ Convex seal ring in compression
- ▶ Stainless steel locking syphon elbow
- ▶ Journal-mounted support system

### Benefits

- ▶ Increased reliability
- ▶ Extended seal life, reduced maintenance frequency
- ▶ No piping modifications, easy upgrade
- ▶ Repeatable syphon clearance setting

Kadant is a leading global supplier of products and services that improve productivity and quality in paper production and other process industries. For the nearest location and contact, visit our Website.
